Address: 2259 Oak Street, Old Forge, New York, 13420

Professional Summary

Experienced in cluster configuration, including Hadoop, Spark standalone, and Cassandra database. Proficient in processing large volumes of data using Hadoop MapReduce and Spark frameworks.

Core Competencies

Spark

Sqoop

Scala

MapReduce

SparkSQL

Hive

HDFS

Pig

Cassandra

DB2

ETL

Datawarehouse

SQL

Professional Experience

ETL Developer/Analyst, ABC Corporation

April 2010 - December 2013

Project: Finance Transformation Program/Financial Processing

Designed, developed, and executed test cases for unit and integration testing

Hands-on experience with ETL tool and scalable architecture for financial reporting (SAFR IBM tool)

Created extract views, summary views, and copy input views using SAFR ETL tool

Created metadata like logical records, physical files, and logical files required for views

Mapped fields to views from source LR to view per business requirements

Created dynamic and static fields for creating views

Participated as a peer reviewer for scholarly publications in the field of data processing
